

Remote Sensing in agricultural claim- and index insurance

Nikolaus Neugebauer
Vienna | 08.06.2021

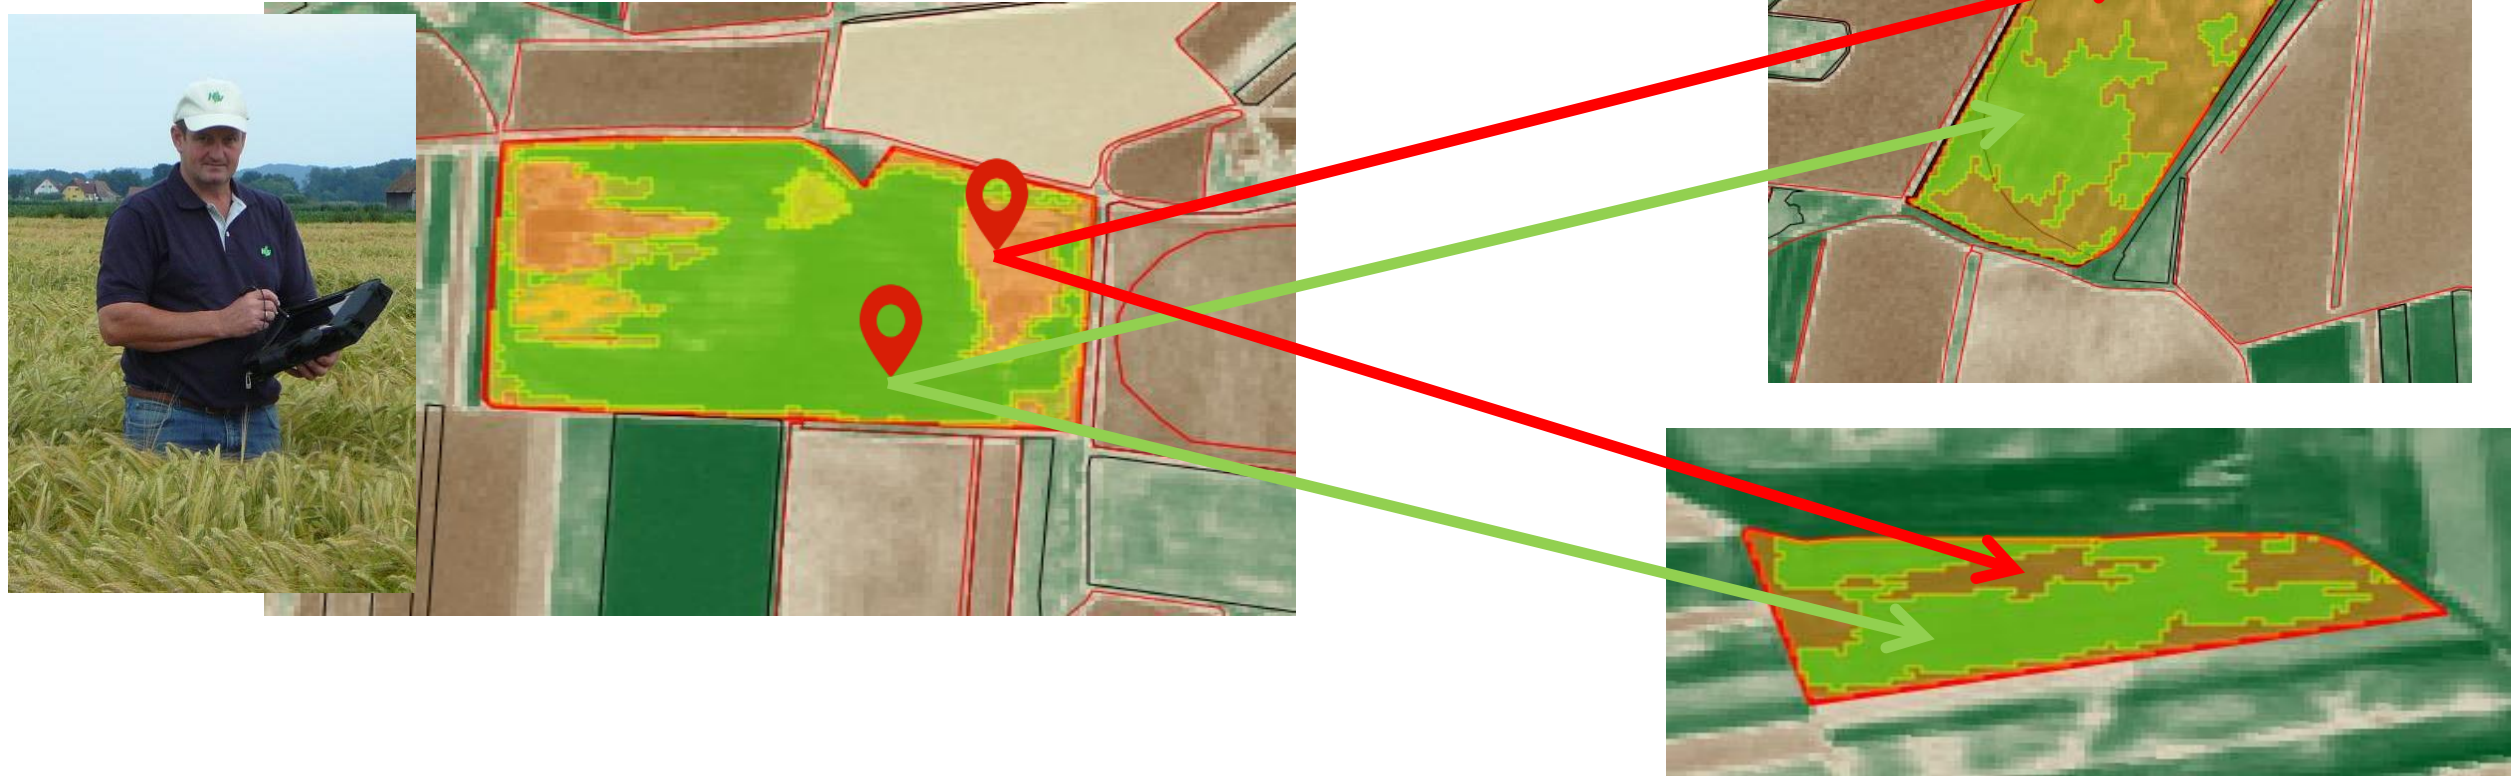

A satellite map of Europe and North Africa, showing forest cover changes over time. The map uses a color scale where green represents forested areas and brown/tan represents non-forested land. The Mediterranean Sea is visible in the lower left, and the Atlantic Ocean is on the far left. The text in the top right corner provides data on forest area changes in millions of hectares (Mio. ha) for three periods: 1947-2003, 2003-2016, and 2016-2020.

1947-2003: 1 Mio. ha
2003-2016: 2 Mio. ha
2016-2020: 3 Mio. ha
