

# WaldCursor

Development and operations of the forestry & environmental portal WaldCursor, deploying EODC

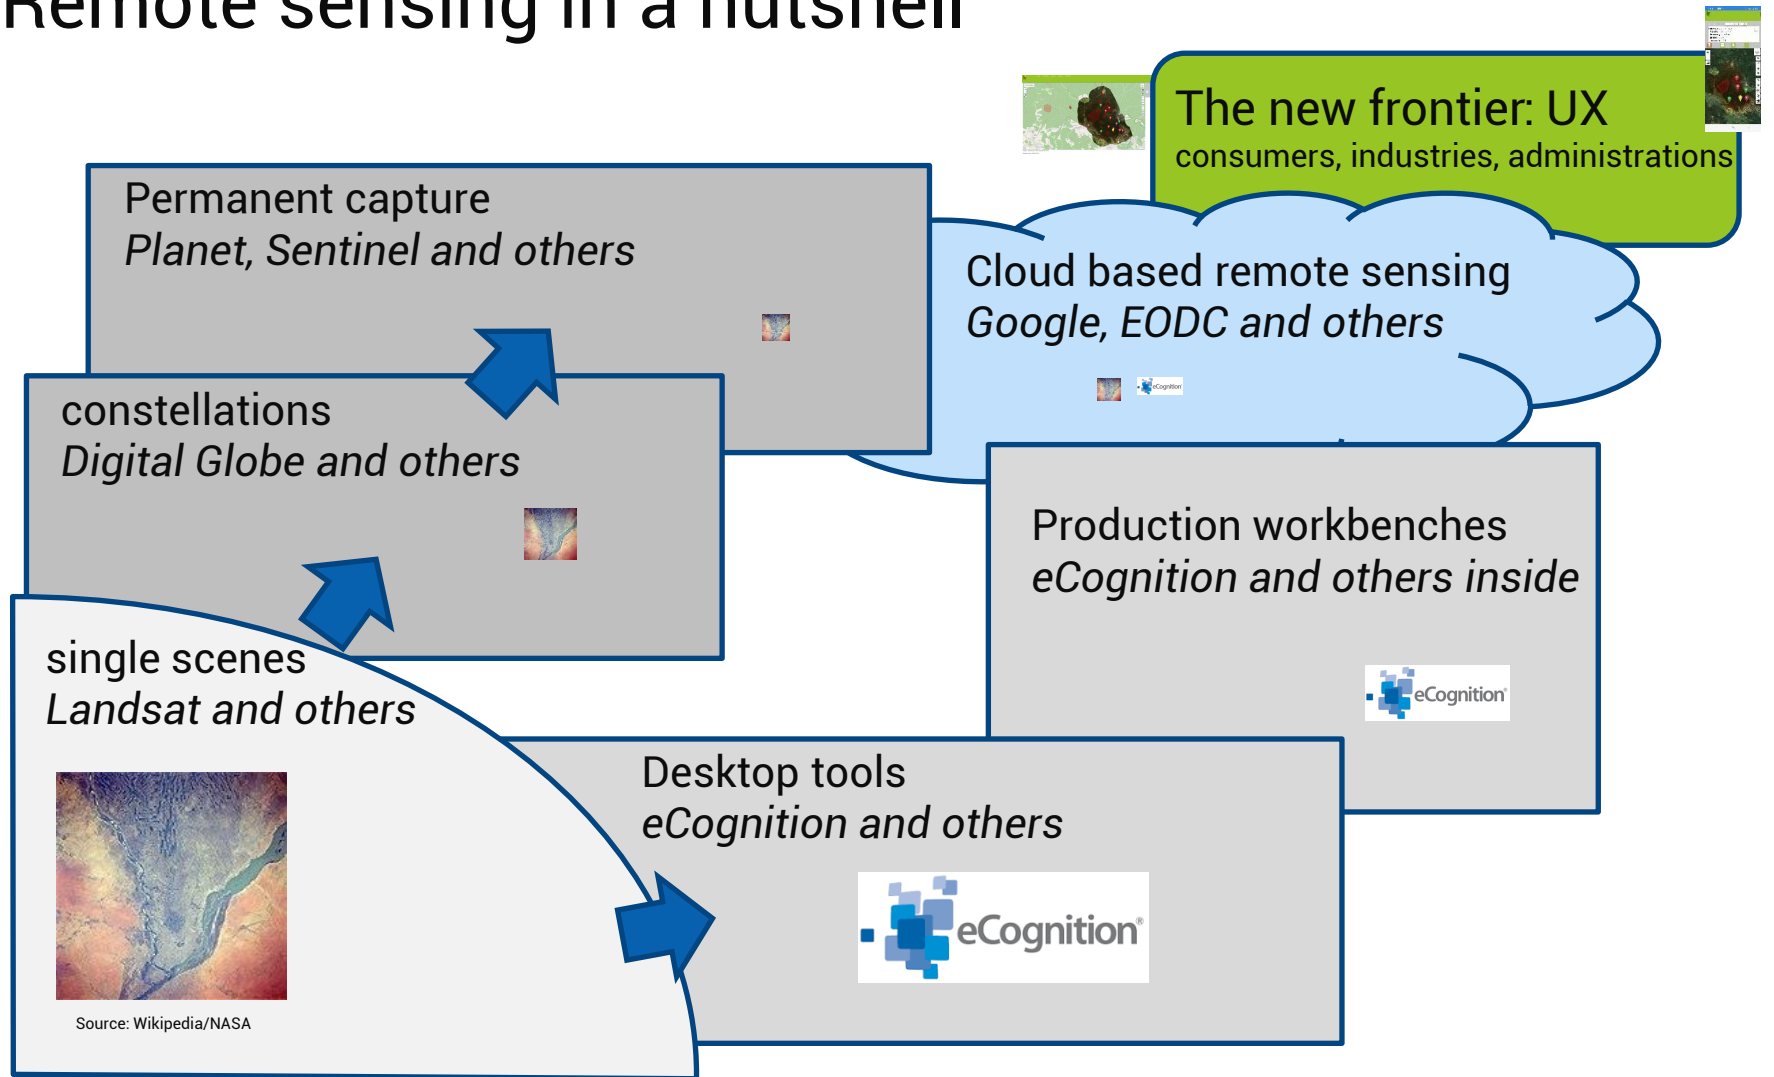

# Development and operations of the forestry & environmental portal Tama WaldCursor, deploying EODC

- Remote sensing in a nutshell
  - from science in the 1980s to becoming a feature in the 2020s
- Forestry and environmental care
  - trees and woods back to center-stage
- Portals: Access to ‚back-end technologies‘ by a simple front-end like a browser and a smart phone
- EODC turning out our first choice

# Remote sensing in a nutshell

Defense.Science.Taxes

Mapping.Environmental.Ressources

Consumers.Administrations.Industries

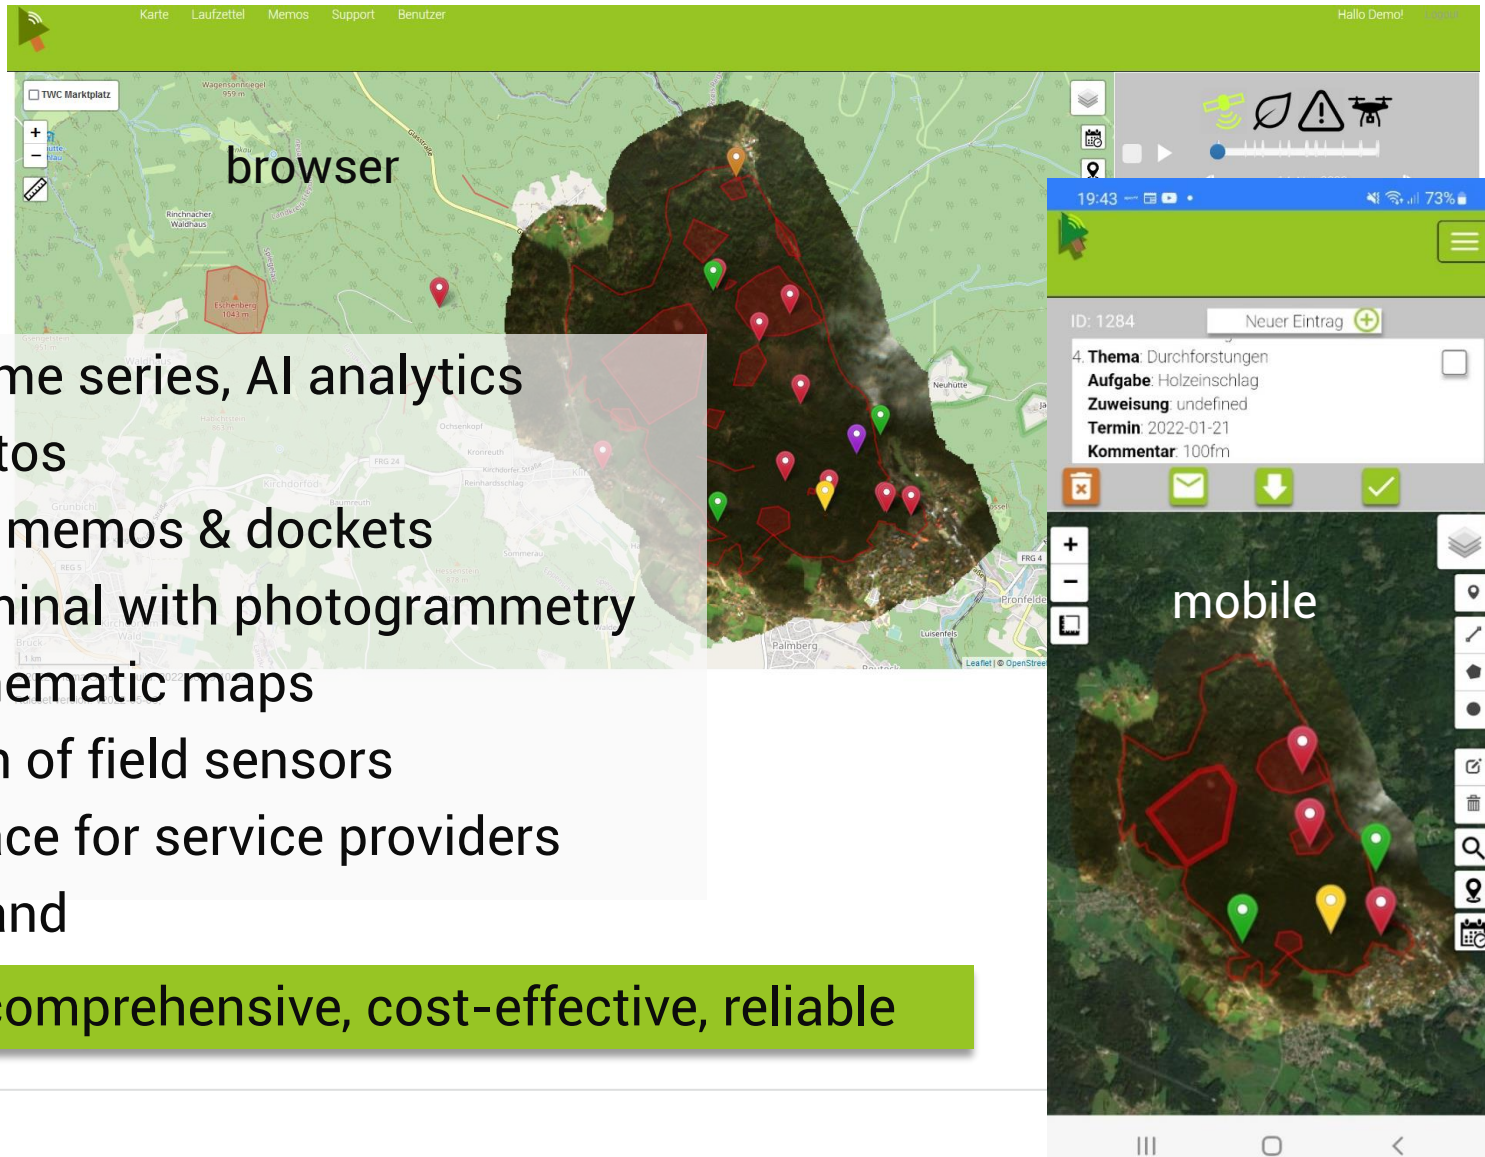

# Forestry & environmental care

Trees for sure are more rare in the universe than diamonds.  
Sooner or later we will understand and value that.

# User interface for forestry & environmental care

- Satellite time series, AI analytics
- Aerial photos
- Geocoded memos & dockets
- Drone terminal with photogrammetry
- Tailored thematic maps
- Integration of field sensors
- Market place for service providers
- and, and, and

Easy to use, comprehensive, cost-effective, reliable

# Tour Demo Account

we are looking forward to showing to you
